Haven

Customer Documentation Overview

2026-09-04

zyvor.dev · Apache-2.0 · open source

Haven is identity for the private cloud — Keycloak + Postgres as one plane, operated from the Haven console.

You want to...	Open
Install and sign in	Getting Started
Learn the shell	Using the Dashboard
Screen-by-screen UX	Page-by-page guides
Look up any route	Complete page index
Deploy / auth / ports	Admin basics
Change passwords	Passwords
Multi-step recipes	Common workflows

Printable PDFs

```
set -a; source scripts/customer-docs/product.env; set +a
code scripts/customer-docs/build-customer-pdfs.mjs
```

Output lands in [pdf/](#).

Product at a glance

Console → `http://<host>:30742/` (NodePort UI + `/api/v1`)

Login → `http://<host>:30742/login`

Keycloak → `http://<host>:30180/admin` (typical NodePort)

Issuer → `http://<host>:30180/realms/master`

Health → `GET /api/v1/health`

Never publish lab IPs — use `<host>` .
